

Tressler LLP Captures Every Minute Efficiently with iTimekeep

For close to four decades, Tressler LLP has provided award-winning legal services, with a dedicated team of approximately 145 employees spread across offices in Chicago, California, New York, New Jersey, and Pennsylvania.

Despite their success, Tressler LLP, like many law firms, faced some limitations with their timekeeping system, a crucial component of their operations and billing process.

Understanding the importance of adopting innovative cloud-based solutions, the firm embarked on a journey to modernize all their systems, which led them to choosing Aderant iTimekeep.

"iTimekeep's cloud technology, user-friendly interface, and mobile capabilities have enhanced our timekeeping and billing processes, enabling our firm to capture time with precision."

- Jennifer Kueker, Chief Financial Officer at Tressler LLP

The timing of the integration of iTimekeep was crucial, taking place during a time when the law firm was closing its books for the year. Daily business operations at law firms cannot be hindered by system upgrades and for Tressler LLP, iTimekeep kept their business running smoothly and efficiently.

"The integration of iTimekeep was seamless because it pointed to the same database we were already using, allowing our accounting team to continue using their existing tools. This smooth transition has significantly improved our efficiency and streamlined our processes, enabling our team to focus on what they do best without disruptions."

- Clifford Hunn, Information Technology Director at Tressler LLP

So, what's on the horizon for Tressler LLP? They are on an exciting journey to become fully cloud-based, positioning the firm for success in an industry brimming with innovation.

"Embracing new technology is the key to unlocking efficiency. At Tressler, we believe in the power of innovation and the necessity of being open to change. A forward-thinking approach is our compass, and we are excited that Aderant will be a part of that journey."

- Jennifer Kueker, Chief Financial Officer at Tressler LLP

In conclusion, the adoption of iTimekeep is part of the firm's long-term approach to continue unlocking new capabilities that enable them to run a better business. Tressler LLP is excited about the future and that's a testament to their confidence in Aderant's commitment to building reliable and innovative technology.
